

# Ubuntu and Debian

Lucas Nussbaum

lucas@{debian.org,ubuntu.com}

# Why I am qualified to give this talk

---

- I will try hard not to be a troll
- Debian Developer since 2006
- Ubuntu Developer (MOTU) since 2006
- Involved in improving collaboration between both projects  
Developed/Initiated : Multidistrotools, ubuntu usertag on the BTS,  
improvements to the merge process, Ubuntu box on the PTS,  
Ubuntu column on DDPO, ...
- Attended Debconf and UDS
- Friends in both communities
  - Would prefer not make enemies today

# What's in this talk

- Description of the Ubuntu development process
  - And how it relates to Debian
- Some truths and mythbusting about Ubuntu and Debian
- Discussion of the current state of affairs

# The Ubuntu Development Process

# Linux distributions 101

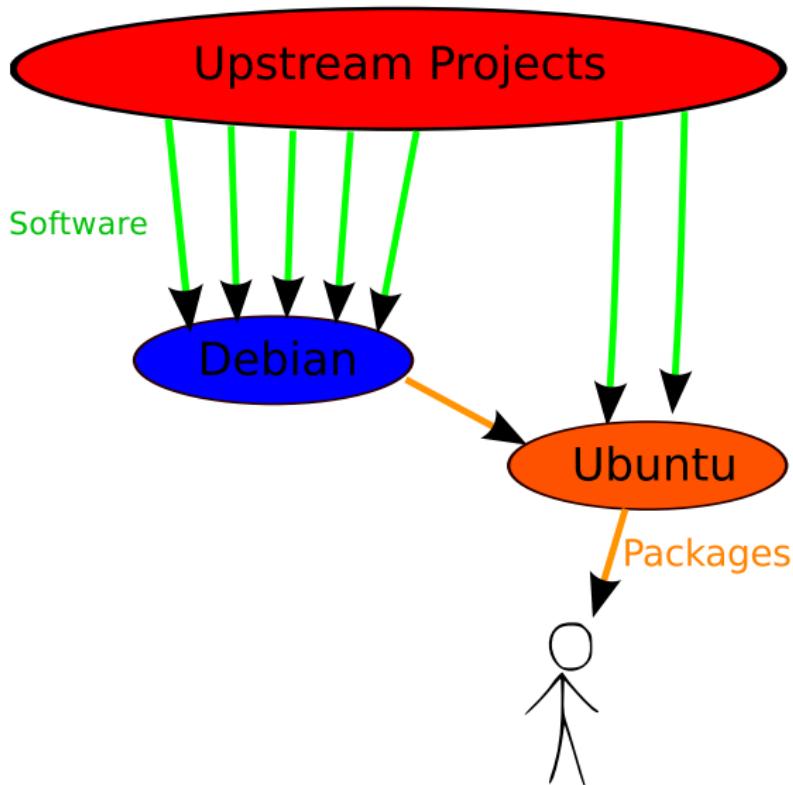

- Take software developed by upstream projects  
Linux, X.org, GNOME, KDE, ...
- **Put it all nicely together**
  - Standardization / Integration
  - Quality Assurance
  - Support
- Get all the fame

# Linux distributions 101

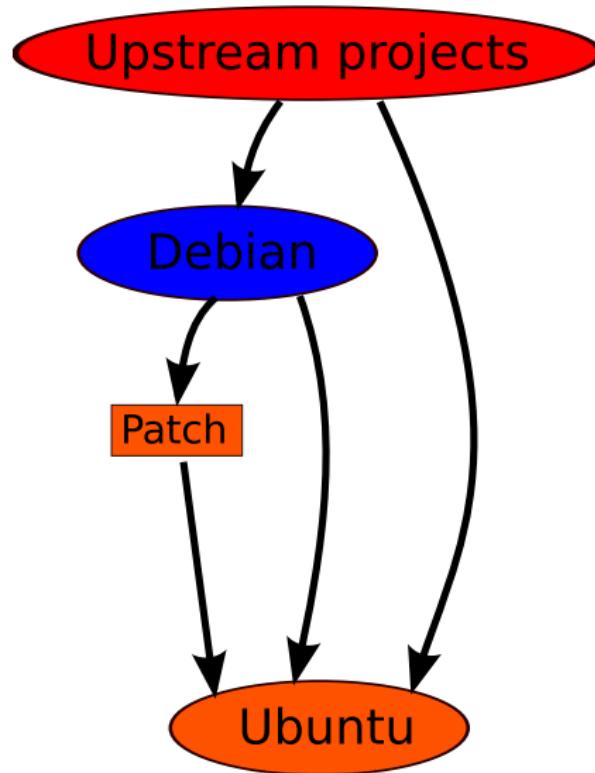

- Take software developed by upstream projects  
Linux, X.org, GNOME, KDE, ...
- **Put it all nicely together**
  - Standardization / Integration
  - Quality Assurance
  - Support
- Get all the fame

**Ubuntu has one special upstream : Debian**

# Ubuntu's upstreams

# Ubuntu Packages Workflow

# Ultimate Debian Database

- Idea : gather all the data from the various Debian services into a single PostgreSQL database
- Many opportunities for data-mining

Currently imported in UDD :

Debian Sources and Packages, bugs, popcon, testing migrations, upload history, orphaned packages, carnivore, lintian, debtags, translations, NEW queue, screenshots, DEHS, ldap, wanna-build, removals, **Ubuntu Sources and Packages, Ubuntu bugs, Ubuntu popcon**

⇒ **Perfect tool to investigate Ubuntu and Debian**

- Let's look at Ubuntu karmic

# Ubuntu Karmic

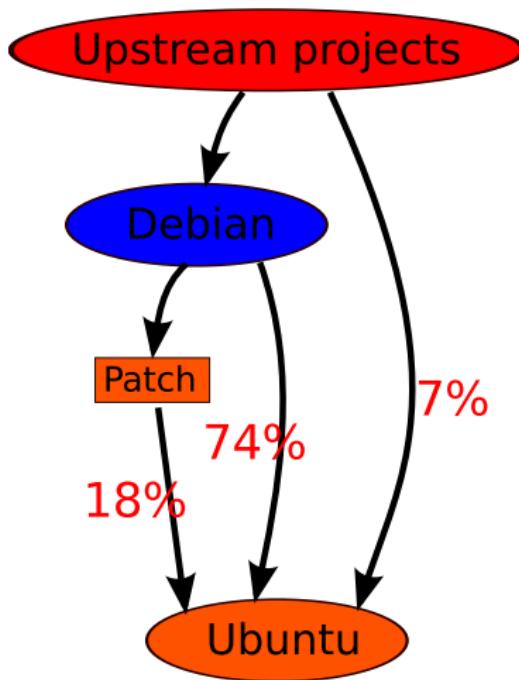

Number of source packages, excluding Ubuntu-specific packages

^language-(support|pack)-.\* , ^kde-l10n-.\* , .\*ubuntu.\* , .\*launchpad.\*

	main	universe	total
total	2131	12848	14979
not in Debian	148 (7%)	971 (7%)	1119 (7%)
changed	988 (46%)	1752 (14%)	2740 (18%)
newer upstream	260 (12%)	272 (2%)	532 (4%)
unchanged	995 (47%)	10125 (79%)	11120 (74%)

restricted ⇒ main, multiverse ⇒ universe

# Ubuntu Packages Workflow

4% of the "patched" packages are newer upstream releases.  
They might be based on the Debian package or not.

# Newer upstream releases (main)

# Bugs

# Bugs

- Ubuntu users have the choice :

# Bugs

- Ubuntu users have the choice :
  - File bug upstream ⇒ might get flamed

# Bugs

- Ubuntu users have the choice :
  - File bug upstream ⇒ might get flamed
  - File bug in Debian ⇒ very likely to get flamed

# Bugs

- Ubuntu users have the choice :
  - File bug upstream ⇒ might get flamed
  - File bug in Debian ⇒ very likely to get flamed
  - File bug in Launchpad ⇒ very likely to get ignored
    - Many users ⇒ many bug reports
    - Not enough Ubuntu developers for bug triaging and squashing
    - Lack of expertise for many packages

# Why collaborate on bugs ?

- Niche packages that rarely receive bugs reports in Debian
- More users of Ubuntu ⇒ more opportunities to run into bugs
- Slightly different environment in Ubuntu (newer toolchain, X)  
⇒ we are likely to run into the same issues in Debian later
- Solving bugs = improving Free Software  
(That's what really matters, no ?)

# Collaboration on bugs, today

---

- Some bugs get filed in Debian by Ubuntu developers
  - origin-ubuntu and ubuntu-patch usertags
  - 250-400 per Ubuntu release cycle
    - Mostly upstreaming of Ubuntu patches to reduce divergence
- Ubuntu box on the PTS, but :
  - Data imported using a fragile hack

```
for b in $(ubuntu_open_bugs_list) ; do wget $text_version_of_the_bug ; done
```

⇒ 80'000 HTTP requests per day
  - Doesn't include private bugs

# Ubuntu box on the PTS

## Overview of nmap source package

Go:   
Switch style: Default

General information	
Latest version:	4.68-1
Maintainer:	LaMont Jones
Conforms to:	3.7.2.2
Priority:	extra
Section:	net
VCS :	Git (browse)
Available versions (more...)	
Oldstable :	4.11-1
Stable :	4.62-1
Testing :	4.68-1
Unstable:	4.68-1
Source package	
Files .dsc .orig : .diff	
Binary packages	
nmap (27 bugs: 0. 12. 9. 6)	

Todo	
Lintian reports 8 warnings about this package. You should make the package <i>lintian clean</i> getting rid of them.	
mentors.debian.net has version 4.76-1 of this package, you should consider sponsoring its upload.	
The package should be updated to follow the last version of <a href="#">Debian Policy</a> (Standards-Version 3.8.2 instead of 3.7.2.2).	
The BTS contains patches fixing 1 bug, consider including or untagging it.

# State of the Debian - Ubuntu relationship

Disclaimer :  
Based on my perception  
(which I hope is quite fair)

# Feelings on the Debian side

---

- Historically : many DDs unhappy about Ubuntu
  - Feeling of being stolen
  - Public claims of "giving back", difficult to back with reality
  - Problems with some Canonical employees tend to reflect on Ubuntu as a whole

# Feelings on the Debian side

---

- Historically : many DDs unhappy about Ubuntu
  - Feeling of being stolen
  - Public claims of "giving back", difficult to back with reality
  - Problems with some Canonical employees tend to reflect on Ubuntu as a whole
- Things have improved considerably
- Most DDs see some good points in Ubuntu
  - Brings a lot of new Linux users  
(and Debian derivative users !)
  - Provides something that just works for their friends/parents
  - Brings new developers to Debian
  - Serves as a technological playground
    - dash as /bin/sh, upstart, debug packages, hardening GCC flags, ...

# **Feelings on the Ubuntu side**

---

- Culture : contributing to Debian is The Right Thing to do
- Many Ubuntu developers contribute to Debian

However :

- Often not a lot to contribute back (on the package level)
  - Many bugfixes are just workarounds
- Canonical is a company
  - Contributes back when it benefits them
  - Don't expect many free "gifts" to Debian

# Challenges and open questions

---

Since 2004, Debian has :

- lost relevance, by losing a large number of users
- gained relevance, by becoming the basis of a major distro

Improving collaboration between Debian and Ubuntu :  
benefits both (and the Free Software ecosystem as a whole)

# Challenges and open questions

---

Since 2004, Debian has :

- lost relevance, by losing a large number of users
- gained relevance, by becoming the basis of a major distro

Improving collaboration between Debian and Ubuntu :  
benefits both (and the Free Software ecosystem as a whole)

Challenges / open questions :

# Challenges and open questions

---

Since 2004, Debian has :

- lost relevance, by losing a large number of users
- gained relevance, by becoming the basis of a major distro

Improving collaboration between Debian and Ubuntu :  
benefits both (and the Free Software ecosystem as a whole)

Challenges / open questions :

- Where will innovations happen ?
  - Ubuntu : very well organized to innovate
  - Debian : bikeshedding tends to be discouraging

# Challenges and open questions

Since 2004, Debian has :

- lost relevance, by losing a large number of users
- gained relevance, by becoming the basis of a major distro

Improving collaboration between Debian and Ubuntu :  
benefits both (and the Free Software ecosystem as a whole)

Challenges / open questions :

- Where will innovations happen ?
  - Ubuntu : very well organized to innovate
  - Debian : bikeshedding tends to be discouraging
- Will Debian be more than a *package supermarket* ?
- Problem in Ubuntu : quality of "uncared-for" packages
  - How will Ubuntu overcome that ?

# (Late) Christmas Wishlist

- More technical discussions between Ubuntu and Debian  
Some productive discussions on debian-devel@ recently. There could be more.
- Easier access to data from Launchpad  
Direct access to the PostgreSQL DB ?
- Personal Packages Archives for Debian
