**2nd International Workshop on Enterprise and Networked Enterprises Interoperability (ENEI’2006)**

http://www.loria.fr/~nacer/ENEI06.htm

Vienna, Austria, 4\(^{th}\) September 2006

Support requested from the FP6 IST-508-011 INTEROP NoE (http://www.interop-noe.org)

co-located with the 4th International Conference on Business Process Management
http://bpm2006.tuwien.ac.at/cfw/

Follow-up the success of the first edition of the ENEI’05 workshop (http://www.loria.fr/~nacer/BPM-ENEI05/ENEI-CfP.html) this second edition addresses computer-supported integration and interoperability of enterprise applications and software. Indeed, enterprises are provided with collections of heterogeneous applications and software tools that were nor designed nor developed to favour their interaction and their cooperation. The problem is more crucial when one considers networked enterprises and enterprise expansion (through, for instance, alliances or merging). Moreover, interoperability within an enterprise and between enterprises is not limited to the only data interoperability but it should consider additional levels like applications, business models, process models, enterprise models, and their supporting systems (when these are available). *One of the focus of this workshop edition is semantic-based solutions and enabling technology for enterprise and networked enterprises interoperability.*

**Workshop Objectives**

The aim of the workshop is to bring together researchers and practitioners to present, discuss and evaluate the variety of practices, novel methods, automated support, architectures and technologies that may improve the ability of an enterprise "as a whole" to easily, seamlessly, correctly and safely render its existing (as well as its coming) applications and software communicate and cooperate.

**Call for papers**

Full papers, experience reports as well as position papers are sought on the list of topics below. All the submissions will be reviewed by at least two members of the international programme committee.

Full papers should be no longer than 12 pages, experience reports and position papers should be no longer than 5 pages.

All the submissions must follow the Springer Verlag LNCS style (see http://www.springer.de/comp/lncs/authors.html for instructions).
Authors are invited to submit their manuscripts electronically to Nacer.Boudjlida@loria.fr in PDF format, no later than May 1, 2006. The accepted full papers will be published by Springer-Verlag as an LNCS Volume. However, they will be included in the proceedings when one of the authors commits to register and to attend the workshop.

**Topics**

- Semantic enrichment of enterprise models for interoperability
- Knowledge-based and semantic-based support for enterprises’ models and systems interoperability.
- Methods and patterns for networked enterprise systems interoperability.
- Enterprise models management: integration, evolution, model-based interoperability, etc.
- Enterprise business and manufacturing applications (ERP, SCM, APS, MES, SCE …) interoperability.
- Communication and cooperation in virtual enterprises.
- Integration and coupling of enterprise’s models and systems.
- Interoperable enterprise electronic governance and business.
- Enabling technology for enterprises interoperability.
- Formal foundations of interoperability solutions.

**Program committee**

**Chairs**
- Boudjlida, Nacer (UHP Nancy 1, LORIA, France)
- Panetto, Hervé (UHP Nancy 1, CRAN, France)

**Members**
- Baina, Karim (ENSIAS, Morocco)
- Bellahsène, Zohra (University of Montpellier, LIRMM, France)
- Berio, Giuseppe (University of Torino, Italy)
- Boufaïda, Mahmoud (University of Constantine, Algeria)
- Carvalho, Joao Alvaro (University of Minho, Portugal)
- Castano, Sylvana (University of Milano, Italy)
- Chatha, Kamran Ali (Lahore University of Management Sciences, Pakistan)
- Chen, Pin (DSAD, Defence Science & Technology Organisation, Australia)
- D’Aquin, Mathieu (LORIA, France)
- Diamantini, Claudia (Università delle Marche, Italy)
- Dubois, Eric (CRP Henri Tudor, Luxembourg)
- Gruhn, Volker (University of Leipzig, Germany)
• Hahn, Axel (University of Oldenburg, Germany)
• Jeusfeld, Manfred (Tilburg University, The Netherlands)
• Johanson, Paul (KTH, Sweden)
• Krogstie, John (Norwegian Institute of Science and Technology, Norway)
• Lenzerini, Maurizio (Università degli Studi di Roma "La Sapienza", Italy)
• Mezgar, Istvan (Hungarian Academy of Sciences, Hungary)
• Molina, Arturo (Tecnológico de Monterrey, Mexico)
• Opdahl, Andreas L. (University of Bergen, Norway)
• Oquendo, Flavio (University of South Brittany at Vannes, France)
• Perrin, Olivier (University of Nancy 2, LORIA, France)
• Petri, Michaël (University of Namur, Belgium)
• Tari, Zahir (RMIT University, Melbourne, Australia)
• Slimani, Yahya (FST, University of Tunis, Tunisia)
• Velardi, Paola (Università degli Studi di Roma "La Sapienza", Italy)
• Whitman, Larry (Wichita State University, USA)
